

UNILAC PORTFOLIO

MULTI FUNCTIONAL FEED FOR DAIRY COWS & BUFFALOES, BASED ON INNOVATIVE SFOS TECHNOLOGY

UNILAC PORTFOLIO HAS BEEN DEVELOPED BY DE HEUS BASED ON SFOS TECHNOLOGY FOR BOTH TRADITIONAL AND COMMERCIAL DAIRY FARMERS. THE SFOS TECHNOLOGY ENABLES EFFICIENT UTILIZATION OF THE RUMEN OF DAIRY CATTLE.

Unilac product range contains a solution for cows and buffaloes. The product has been designed to facilitate a better consumption and digestion of roughage. This will result in more milk out of roughage due to a better digestion. Next to this advantage, cows and buffaloes will be more fertile and persistent.

Our special selected raw materials are pre cooked and pelletized into the Unilac products using globally acclaimed SFOS technology. This combination facilitates a more efficient digestion resulting in a better milk production with good FAT and SNF. **MODE OF ACTION**

UNILAC PRODUCT RANGE

Unilac Bronze

BENEFITS UNILAC BRONZE

- A cost-effective compound feed
- Optimizes milk yield, FAT and SNF content
- Good conception rates
- Healthy animals

CHARACTERISTICS UNILAC BRONZE

- Highly palatable product
- Hygienized product (precooked and crumbled)
- Stable nutritional product
- High Quality Protein Used

Unilac Silver

BENEFITS UNILAC SILVER

- A cost-effective compound feed
- Optimizes milk yield, FAT and SNF content
- More milk from fodder resulting in more economical rations
- Good conception rates
- Healthy animals

CHARACTERISTICS UNILAC SILVER

- Highly palatable product
- Hygienized product (precooked and crumbled)
- Stable nutritional product
- High Quality Protein Used

Unilac Gold

BENEFITS UNILAC GOLD

- Improved FAT and SNF
- More milk from fodder
- Good conception rates
- Improved FAT and SNF
- More milk from fodder
- Good conception rates
- Healthy Animals

CHARACTERISTICS UNILAC GOLD

- Hygenized product.
- Pre cooked and crumbled
- De Heus European
- Quality control of raw materials
- Crumble form for efficient use

Power Lac

BENEFITS POWER LAC

- Improved FAT and SNF
- More milk from fodder
- Good conception rates
- Healthy animals

CHARACTERISTICS POWER LAC

- Hygenized product.
- Pre cooked and crumbled
- De Heus European
- Quality control of raw materials
- Crumble form for efficient use

Unilac Buff

BENEFITS UNILAC BUFF

- Maintains higher milk FAT % and SNF content
- More milk from fodder resulting in more economical rations
- Healthy animals
- Good conception

CHARACTERISTICS UNILAC BUFF

- Highly palatable product
- Crumble form for efficient use
- High quality protein used
- Crumble form for efficient use

● FEEDING ADVICE

1 kg of feed to every 2.5 liters of milk. Best results are achieved when Unilac Feed is fed 4 times a day uniformly mixed with roughage
