

# COOLCARE®

## QUICK START GUIDE

Start using the app in just 6 simple steps:

**1.** Select the species you like

**2.** Allow location access for automatic recognition or set manually

**3.** Check temperature and humidity values. Can be based on local weather forecast or set manually

**4.** If you prefer barn temperature and humidity, you can also set ventilation speed in the barn to work with sensible temperature

**5.** Based on today's heat stress index score, you can check tips & tricks to deal with the negative effects of heat stress on your animals and contact a De Heus expert

**6.** Before you close the app, look a few days ahead and setup an alarm. You will receive a push-up notification if the risk for heat stress increases
